Design By Arik Levy

Wireflow designed by Arik Levy. Hanging lamp. The elegant structure of fine cables and LED terminal by Wireflow allows the combination of multiple individual pieces to carry out major graphic lighting installations which generate a visual opportunity of lines and points of light and bring a markedly conceptual character to an intangible product. Employing CREA product configurator software, the design can be modified to adapt to your specific project requirements. The electrical connection point can be positioned on the ceiling or wall
